SUMMARY

Motivated Information Technology student proficient in Java, React.js, Flutter, and Python. Experienced in building projects spanning desktop applications, web-based tools, and mobile apps. Skilled in HTML, CSS, MySQL, MongoDB, and Git with a strong foundation in Data Structures and OOPs. Eager to contribute to a dynamic development team and deliver real-world impact.

EDUCATION

2024 – 2028	B.Tech in Information Technology at Kongu Engineering College	(CGPA: 8.69/10)
2024	Class 12th (HSC) — PRG VN Matric Hr Sec School	(91%)
2022	Class 10th (SSLC) — PRG VN Matric Hr Sec School	(92.8%)

SKILLS

Languages	Java, Dart, Python
Frontend	HTML, CSS, React.js, Flutter
Backend	Node.js
Databases	MySQL, MongoDB
Tools	Git, GitHub, VS Code, Inkscape
Coursework	Data Structures, DBMS, Computer Networks

PROJECTS

Visitors Management System

[GitHub](#)

- Built a GUI-based desktop application using Java Swing/AWT to manage visitor entry and exit logs in real time with an event-driven interface.
- Integrated MySQL database to store, retrieve, and manage visitor records efficiently with search functionality.
- Implemented core features including visitor registration, log tracking, and real-time data updates across the application.

AI-Powered Resume Analyser

[GitHub](#)

- Developed a web-based resume analyser using HTML, CSS, and JavaScript that automatically parses uploaded resumes and extracts structured information instantly.
- Designed a clean, responsive UI that allows users to upload and review parsed resume data with minimal friction.

CERTIFICATIONS

• Deep Learning Onramp & MATLAB Certified	MathWorks	2024
• Frontend Web Development	Infosys Springboard	2024
• Introduction to Generative AI	IBM Future Skills	2024
